

Trixfer Re-introducing the bates® Trixfer™

Marinco Power Products welcomes back the bates® Trixfer™ Stage Pin Jumper Tap for an encore performance!
Now U/L listed!

Trixfer™ Setup:

- Fast and easy to use - daisy Chain up to four lights with limited connections
- Provides cleaner connections vs. y-style and v-style
- Eliminates need for extra cables, connectors, or jumpers
- Provides extra flexibility where circuits limited
- Inline connectors help eliminate extra taping and angle prep

The Trixfer™ delivers grounded 20A power to multiple devices without the hassle of a cumbersome twofer. Now plug multiple cords into a single circuit. Connector configurations available include **female-female** and **male-female** combos.

- Replace V style twofers with trixfers - lights can then be as far apart as needed without adding extra cable
- Replace Y style twofers with trixfers - replace much of the taping and angles required
- Replace connectors on lights that are commonly twofered (such as tormentors or box booms) to save additional components and time

Part #	Totals Amps	Input Voltage	Dimensions (in)	Weight (oz)
TRIXFER	20A	125V	1.1x3x5.1	8
TRIXFER.FF	20A	125V	1.4x4x7	4.8
